FRONT LOADER

Quick Attach/Detach Front Loader

The loader doesn't require tools or additional personnel to remove or install. The conveniently located quick attach/detach pins can be handled from the operator's seat.

Single-lever Joystick Control

All loader operations—raising, lowering, dumping, and rollback functions—are controlled by a single, tractor integrated joystick that's within easy reach for maximum convenience.

Protected Hydraulics

The front loader's H-shaped stand design not only makes it easier to attach and detach, but it provides exceptional protection for the hydraulic hoses when the stand is folded. Plus, all of the hoses are routed in a recess under the loader lift arm for increased protection.

Kubota Quick Coupler (Optional)

Kubota's quick coupler allows you to quickly and easily attach/detach attachments, such as the 54" or 60" bucket, a pallet fork, and more—all without the use of tools.

Braceless Frame

For optimum visibility and easier maintenance, we've eliminated the connectors and braces around the front loader arm.

FRONT LOADER

Front Grill Guard (Standard With Front Loader)

Curved Boom Design

The LA504's curved boom design offers a better field of vision during front loader operations. It also gives the loader a modern, sleek appearance.
