## BX1860/BX2360 BX2660 (FRONT)

### FEATURES

#### Powerful Kubota Diesel Engine

BX-Series tractors are equipped with 18 and 23 HP diesel engines (BX1860 and BX2360 respectively), as well as a 25.5 HP diesel engine (BX2660). These 3-cylinder workhorses offer unparalleled power for tractors this size, and more than enough muscle for all your gardening and mowing duties.

#### Hydrostatic Power Steering

A standard feature on all BX-Series tractors, power steering makes steering practically effortless, thus reducing stress and fatigue.

#### Deluxe High-Back Seat And High-Back Reclining Seat

Your high-back seat, standard on the BX1860/BX2360, provides you with soft cushioning and superior thigh support for exceptional comfort during operation. The seat of the BX2660 takes comfort a step further, with a luxurious reclining feature that adjusts to your natural posture.

#### Reverse Air Flow

The radiator of the BX-Series is positioned in the middle of the tractor rather than the front. So, airflow is taken in from the operator area and pushed towards the front of the hood. This helps reduce overheating, prevents grass from getting in the radiator grill and keeps the operator cooler.

#### Bright Halogen Headlights

The halogen headlights of the BX offer a clear bright light at dawn, dusk or dark of night. Furthermore, their casing and style have been designed to give the tractor a sleeker look.
