FEATURES

Versatile Category I 3-Point Hitch

Put your BX-Series to work with its Category I 3-point hitch. This sturdy, hydraulically controlled hitch allows you to attach a wide array of rear implements.

2-Pedal HST Operation

When frequent changes in speed and direction are needed, HST responds with its smooth operating forward and reverse pedals, leaving your hands free for steering and implement control.

Spacious Operator Area

The pedal layout on BX-Series tractors helps aid operator comfort. The forward and reverse HST pedals are split and the differential lock is located on the side of the seat. This design provides a larger deck area, which offers more foot room, eliminating the cramped feeling of most other tractors in this class.

Quarter-Inching Valve

With increments of $\frac{1}{4}$ " at the lower link end, our quarter inching valve provides easier implement control. The lever guide's regulator allows smaller adjustments, which are often required when attaching/detaching 3-point mounted implements or when performing sensitive jobs.

Digital Tachometer

The BX-Series tractors feature a digital tachometer that offers operators precise monitoring of engine revolutions, especially when operating the PTO. When the engine is off, the digital tachometer displays the hour meter.

FEATURES

Cruise Control

For carefree mowing of large spaces, set the BX-Series' cruise control to maintain a constant speed without keeping your foot on the forward pedal. (Optional on the BX1860)

Rigid ROPS

Rigid Roll-Over Protective Structure comes standard on the BX1860, BX2360 and BX2660.

Deluxe Lever Guide

Cup Holder
