

# BX

## BX1860/BX2360 BX2660

# FRONT LOADER

### **Rounded Boom**

The BX's rounded boom perfectly complements the overall tractor design. But its benefits don't end there. It also offers greater visibility.

### **H-Shaped Stand For Easy Attach/Detach**

The BX front loader has an H-shaped stand, which makes it easy to attach and detach. This design also provides better protection for hoses when the loader is folded.

### **Hose Protection**

The loader hoses are tucked inside the boom for greater protection and better visibility.

### **Front Implement 4-position Control Valve (Optional)**

Our optional front 4-position valve provides you with the ability to quickly and easily attach the front loader and other front-mounted implements. Furthermore, the valve does not get in the way and gives the tractor a clean and sleek look.

### **Front Guard (Option)**

A sturdy and distinctive front grill guard protects the front end, which has been rounded to match the tractor's modern design.
