

L

L2800/L3400

FEATURES

Powerful Engines to Take On Tough Projects

The L2800 gear-drive model puts out an impressive 25 PTO horsepower (HST model: 23.5 PTO horsepower), while the L3400 gear-drive model provides a vigorous 30 PTO horsepower (HST model: 28.5 PTO horsepower). These clean-running engines are compliant with the EPA's Interim Tier 4 emissions standards.

HYDROSTATIC TRANSMISSION (HST MODEL)

3-range Shift/Cruise Control For Optimal Speed Selection.

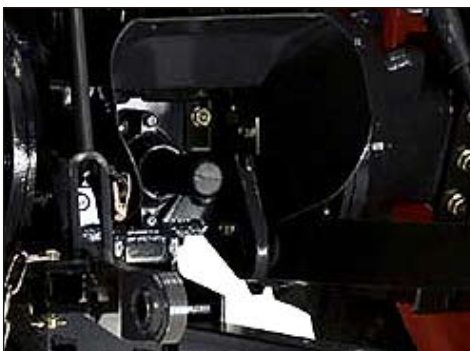

An in-line shifting pattern enables easy range shifting from low to medium to high. The shift is also conveniently on the left side of the operator's seat. For an easy way to keep your working speed constant, simply set the infinite, mechanical cruise control lever on either the L2800 or L3400 4WD HST models to your desired speed—and go. Changing your speed is as simple as operating a single lever.

GEAR-DRIVE TRANSMISSION (GEAR MODEL)

Powerful And Versatile Means Getting The Job Done Faster.

You'll finish the big jobs easily with a mechanical shuttle transmission. For easier front-loader operation, the mechanical shuttle shift has a forward/reverse in the low and reverse ranges. Moreover, the transmission offers 8 forward and 4 reverse speeds (8F/4R), enabling you to select the right speed for higher productivity.

Live Continuous-running PTO (Transmission-driven PTO on L2800 Gear-drive Model)

The L2800/L3400 HST models and the L3400 gear-drive model include a live, continuous-running rear PTO for easier operation. The HST models also feature an over-running clutch on the PTO shaft to protect the transmission. Finally, a stationary PTO has been included to enable the use of various implements, such as pumps.

Full-open Hood and Slide-out Grill

Whether simple maintenance or a more involved repair, a one-piece, full-opening hood exposes most engine components, making it easier to do either. Removing the front grill is fast, too. Simply slide it out.

Large Fuel Tank

An ample 9-gallon fuel tank lets you fill up with more fuel so you can operate longer.

L2800/L3400

FEATURES

Spacious Operator's Deck

To provide comfort, the L2800 and L3400 feature a roomy operator platform. Its semi-flat design also makes getting on and off the tractors easier.

Bevel Gear Front Axle (4WD model)

A superior feature that delivers an extremely tight turning radius with full power transfer to the wheels at every steering angle.

Smooth Power Steering

To reduce fatigue, both 2-wheel drive and 4-wheel drive models come equipped with smooth, easy-turn, integral power steering.

Choice Of Tires

Tires designed especially for specific jobs enable the L2800 and L3400 to perform even better. Select from AG, Industrial, and Turf.
