# BACKHOE

### **Mechanical or Hydraulic Thumb (option)**

Our optional auxiliary hydraulic control valve and hydraulic thumb give you greater versatility. The BH92 is equipped with a built-in thumb bracket as standard equipment to allow easy field installation of the optional six-position mechanical thumb or hydraulic thumb.

### **Protected Hoses**

The hydraulic hoses are neatly tucked inside the backhoe to protect from wear and tear.

### **Wide Legroom**

Our full-flat deck gives you ample legroom. This makes operation more comfortable and mounting/dismounting the tractor easy.

### **Quick Attach/Detach**

BH92 is equipped with a quick attach/detach mounting system. This makes attaching or detaching the backhoe easy. You can quickly move on to your next job.

### **Quick Coupler (Option)**

With our optional quick coupler, changing buckets is a snap. This is the perfect option for those who do a lot of bucket work and frequently change bucket types.

# BACKHOE

### Angle of Departure

Industry leading angle of departure provides for exceptional clearance in uneven work surfaces and no tail dragging when loading units on a trailer.

### Extreme Duty Subframe

The backhoe attaches to the tractor via a subframe that ties the tractor's loader mounting, rear angles and ROPS structures to the backhoe for a very mounting and structural integrity of the tractor/loader/backhoe.

### Curved Boom Design

The curved boom of the BH92 serves three distinct purposes. It helps you clear dig area obstacles and easily reach maximum dig depth with a minimum trench cut. The arch of the boom also clears the sideboards of a truck, allowing you to position materials in the center.
