MX4700/5100 2WD/4WD

FEATURES

Powerful, Quiet and Clean Engine

Rev it up and get moving. The MX4700 and MX5100 boast 46 and 50 net engine horsepower respectively. The 4700 delivers 39.5 PTO horsepower and the 5100 offers 44 PTO horsepower, giving you the power to work more efficiently. These tractors also feature a built-in balancer that helps minimize vibration and noise. Plus, they comply with 2008 EPA Interim Tier 4 emission regulations, to keep you running clean.

Hydrostatic Transmission (HST model)

Kubota's new MX4700 and MX5100 HST models feature hydraulic servo systems that increase pedal responsiveness, providing easy pedal-shifting operation for smoother performance and improved control, regardless of load size. Forward and reverse directional changes are simple. HST also reduces shock, vibration, noise and fatigue to improve tractor performance and operator comfort.

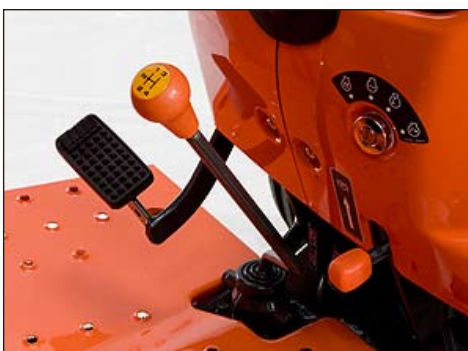

Transmission Controls (HST model)

Located on the left side of the tractor, the hand controls of our new HST models are both ergonomic and user friendly. They feature a straight-line range gear-shift and a stepless cruise control, which keeps your working speed variation to a minimum, regardless of the terrain.

Synchro Shuttle Transmission

Conveniently located at the left side of the seat, this shuttle lever allows you to quickly and easily switch between forward and reverse. It's particularly handy when performing tasks that require repetitive forward/ reverse motions, like front loader work.

Partially Synchronized Main Gear Shift

With 4 main shift speeds and 2 range-shift speeds (Hi/Lo), you have 8 forward and 8 reverse speeds to choose from, giving you the versatility you need to maximize your productivity. Plus, two of the main shift speeds are synchronized, so you can spring into action with smooth operability and powerful agility.

MX4700/5100 2WD/4WD

FEATURES

Performance-matched 3-point Hitch

Kubota's durable 3-point hitch is performance-matched to operate seamlessly with the MX4700 and MX5100. Both tractors' hitches allow attachment of a wide variety of Category I and II rear-mounted implements. The MX5100's hitch also boasts telescopic lower link ends* and stabilizers* for easier attachment and higher lift capacity. *MX5100 4WD only.

Enhanced Operator Comfort

Kick back, relax, and get working. The full-flat deck enables safe and easy mounting/dismounting, and the 30 spacious inches between fenders gives you all the room you need to work in comfort. In addition, the easy-to-operate hanging pedals optimize legroom, and, for really thirsty work, the convenient cup holder will always keep your beverage within easy reach.

2WD/4WD

The MX4700 and MX5100 are available in 2WD or 4WD, letting you choose the right tractor to meet your needs. The 4WD model provides outstanding pulling power and traction in almost any working condition, and features a bevel-gear front axle to deliver a smooth and full-power transfer, and greater all-around maneuverability.

Full-open One-piece Hood

The MX4700 and MX5100 are equipped with a slanted hood, halogen headlights, and newly designed front grill for improved visibility and a sophisticated appearance. The full-opening one-piece hood features dual gas shock assist for easy opening, so you can perform routine maintenance quickly and efficiently, and get back to getting the job done.

Power Steering

Make tight turns or take the straight path with the same smooth ease. These tractors feature responsive power steering to enhance maneuverability and make steering worry-free when a heavy load is applied or the front loader is used.
