RTV1100

PREMIUM GRAND CAB

Air Conditioner And Heater

The only vehicle of its kind with a standard air conditioner, the RTV1100 knows how to keep you cool. Located under the hood for a lower center of gravity, the air conditioning unit in the RTV1100 is the same one used in our high-end M-Series tractors. The RTV1100 also has a heater, which is ultra-efficient due to efficient ducting and the thermodynamics of the integrated cabin design.

Sliding Window

The sliding windows are positioned conveniently and will open wide enough to facilitate activities such as supervising, communication, spraying and maintenance work, mail retrieval and more.

- Dimension of opening: 8 inches wide x 17.5 inches high
- Standard on both driver and passenger sides
- Contemporary frameless and rubber gasket-free design

Windshield Wiper

See clearly on the rainiest days with this durable, wide-coverage wiper and washer.

Unibody Cab and Chassis Frame

The unibody cab and chassis frame of the RTV1100 ensures a smoother and more stable ride. Moreover, this efficient design equates to less overall weight, yet maintains the strength necessary to qualify it as an OSHA 1928.52 Rollover Protective Structure (ROPS).

Interior Rear View Mirror

A rear view mirror, optional on other models, is now standard equipment on the RTV1100.
