Confirmation Letter
This is an English translation of the Quarterly Report filed with the Director of the Kanto Local Finance Bureau via Electronic Disclosure for Investors’ NETwork ("EDINET") pursuant to the Financial Instruments and Exchange Act of Japan.

The translation of the Confirmation Letter for the original Quarterly Report is included at the end of this document.

For the purposes of this Quarterly Report, the “Company” refers to Kubota Corporation and its subsidiaries unless context indicates otherwise.

1. Overview of the Company

1. Key Financial Data

(Unit: millions of yen, except earnings per share)

Net cash used in investing activities: (30,417) (64,598) (91,470)

Net cash provided by (used in) financing activities: 36,193 6,503 (21,515)

Cash and cash equivalents, at the end of the period: 250,659 220,759 199,665

(Notes)
1. The condensed consolidated financial statements and the consolidated financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").
2. As the Company prepares the condensed consolidated financial statements, its non-consolidated financial data are not presented.
3. Revenue does not include consumption taxes.
4. Amounts less than presentation units are rounded to the nearest unit.
5. Earnings per share attributable to owners of the parent—Diluted is not stated because Kubota Corporation did not have potentially dilutive common shares that were outstanding during the period.

2. Description of Business

There were no material changes in the Company’s business during the six months ended June 30, 2020, nor were there any material changes in its associates.
2. Business Overview

1. Risk Factors
For the six months ended June 30, 2020, there were no events or facts described in “2. Business Overview” or “4. Financial Information,” that might have material effects on investors’ investment decisions. There were no material changes in the information described in the Risk Factors section of the Annual Securities Report for the year ended December 31, 2019.

The negative impact on results of operations for the six months ended June 30, 2020 caused by the infection spread of COVID-19 is described in “(1) Analysis of Results of Operations” of “2. Analysis of Consolidated Financial Position, Results of Operations, and Cash Flows by Management”.

As of the second quarterly report filing date, the Company expects the infection spread of COVID-19 will settle gradually. However, the negative impact of COVID-19 is expected to continue throughout the year because the pace of a recovery in demand after the resumption of economic activities is expected to be slow and it is expected to take time for a recovery in production, including parts procurement.

(1) Analysis of Results of Operations
For the six months ended June 30, 2020, revenue of the Company decreased by ¥86.7 billion [8.9%] from the same period in the prior year to ¥884.2 billion.

Domestic revenue decreased by ¥19.9 billion [6.4%] from the same period in the prior year to ¥290.2 billion because of decreased revenue in Farm & Industrial Machinery, Water & Environment, and Other.

Overseas revenue decreased by ¥66.8 billion [10.1%] from the same period in the prior year to ¥594.0 billion because of significantly decreased sales of construction machinery, tractors, and engines. On the other hand, revenue in Water & Environment increased.

Operating profit decreased by ¥29.3 billion [26.4%] from the same period in the prior year to ¥81.7 billion because profitability of products, which were shipped in this fiscal year, in its manufacturing bases deteriorated due to a significant reduction in production in the fourth quarter of 2019. In addition, there were some negative effects from significantly decreased sales in the overseas markets and unfavorable foreign exchange rates. Profit before income taxes decreased by ¥30.2 billion [26.4%] from the same period in the prior year to ¥84.4 billion mainly due to decreased operating profit. Income tax expenses were ¥20.6 billion. Share of profits of investments accounted for using the equity method was ¥1.3 billion. Profit for the period decreased by ¥21.6 billion [24.9%] from the same period in the prior year to ¥65.2 billion. Profit attributable to owners of the parent decreased by ¥21.6 billion [26.6%] from the same period in the prior year to ¥59.6 billion.

Revenue from external customers and operating profit by each reportable segment was as follows:

1) Farm & Industrial Machinery
Farm & Industrial Machinery is comprised of farm equipment, agricultural-related products, engines, and construction machinery.

Revenue in this segment decreased by 10.2% from the same period in the prior year to ¥719.0 billion, and accounted for 81.3% of consolidated revenue.

Domestic revenue decreased by 9.1% from the same period in the prior year to ¥144.6 billion. Sales of farm equipment and agricultural-related products decreased mainly due to adverse reaction from rushed demand before the consumption tax hike and a negative effect from voluntary restraint of sales activities along with the infection spread of COVID-19.

Overseas revenue decreased by 10.5% from the same period in the prior year to ¥574.4 billion. In North America, retail sales had been strong mainly due to solid demand since April and a positive effect from introduction of new models. However, wholesales of construction machinery and tractors decreased because of adverse reaction from carryover of shipments of some products from the fiscal 2018 to the fiscal 2019 caused by typhoon, which had occurred
in 2018, and delay in production and shipment caused by suspended operations in its manufacturing bases resulting from the infection spread of COVID-19. In addition, sales of engines also significantly decreased from the same period in the prior year mainly due to a reduction in production of OEM clients resulting from the infection spread of COVID-19 and a deterioration in oil and gas market. In Europe, sales of construction machinery, tractors, and engines significantly decreased mainly due to some negative effects from business suspension by dealers and a reduction in production of OEM clients for engines along with the infection spread of COVID-19. In Asia outside Japan, sales of tractors in Thailand decreased due to a negative impact of water shortage, which had continued since the prior year and inventory adjustments by dealers. On the other hand, sales of engines in China increased due to recovered demand after resumption of economic activities. In addition, sales of farm equipment increased due to a positive effect from introduction of a new model.

Operating profit in this segment decreased by 25.0% from the same period in the prior year to ¥87.1 billion mainly due to significantly decreased revenue in the domestic and overseas markets and a deterioration in profitability of products, which were shipped in this fiscal year, in its manufacturing bases, while there were some positive effects from raised product prices and declined material prices.

2) Water & Environment

Water & Environment is comprised of pipe- and infrastructure-related products (ductile iron pipes, plastic pipes, valves for public sector, industrial castings, ceramics, spiral-welded steel pipes, air-conditioning equipment, and other products) and environment-related products (environmental control plants, pumps, valves for private sector, and other products).

Revenue in this segment decreased by 2.5% from the same period in the prior year to ¥150.3 billion, and accounted for 17.0% of consolidated revenue.

Domestic revenue decreased by 3.3% from the same period in the prior year to ¥130.9 billion. Revenue in pipe- and infrastructure-related products slightly decreased due to a decrease in sales of plastic pipes, air-conditioning equipment and spiral-welded steel pipes caused by the infection spread of COVID-19. On the other hand, sales of some products, such as ductile iron pipes, increased. In environment-related products, revenue from construction of waste disposal and treatment facility in Futaba Town, Fukushima Prefecture decreased mainly.

Overseas revenue increased by 3.3% from the same period in the prior year to ¥19.4 billion. Sales of industrial castings to Korea and membrane systems to China increased.

Operating profit in this segment decreased by 7.7% from the same period in the prior year to ¥9.9 billion due to decreased revenue in the domestic market and an increase in construction costs of plant.

3) Other

Other is mainly comprised of a variety of services.

Revenue in this segment decreased by 6.4% from the same period in the prior year to ¥14.8 billion, and accounted for 1.7% of consolidated revenue.

Operating profit in this segment decreased by 5.7% from the same period in the prior year to ¥1.5 billion.

(2) Analysis of Financial Position

Total assets at June 30, 2020 were ¥3,127.9 billion, a decrease of ¥11.4 billion from the prior fiscal year-end. With respect to assets, finance receivables increased due to the expansion in sales financing operations in North America, where retail sales were strong. In addition, cash and cash equivalents temporarily increased due to the acceleration of funding in preparation for the growing demand for funds caused by the infection spread of COVID-19. On the other hand, trade receivables and inventories decreased mainly due to delay in production and shipment caused by suspended operations in its manufacturing bases resulting from the infection spread of COVID-19. Furthermore, other financial assets also decreased due to sales of securities.

With respect to liabilities, trade payables significantly decreased while bonds and borrowings increased. Equity slightly decreased due to purchases of treasury shares and a deterioration in other components of equity along with fluctuations in foreign exchange rates and prices of securities despite the accumulation of retained earnings. The ratio of equity attributable to owners of the parent to total assets stood at 46.1%, 0.1 percent higher than the prior fiscal year-end.
(3) Analysis of Cash Flows
Net cash provided by operating activities during the six months ended June 30, 2020 was ¥49.5 billion, a decrease of ¥1.4 billion in net cash inflow compared with the same period in the prior year. The decrease was mainly due to an increase in cash outflow related to an increase in finance receivables and a decrease in profit for the period. On the other hand, cash outflow related to the changes in working capital decreased due to a decrease in trade receivables and inventories.

Net cash used in investing activities was ¥30.4 billion, a decrease of ¥34.2 billion in net cash outflow compared with the same period in the prior year. This decrease was mainly due to an increase in cash inflow related to sales of securities and a decrease in cash outflow related to acquisition of property, plant, and equipment.

Net cash provided by financing activities was ¥36.2 billion, an increase of ¥29.7 billion in net cash inflow compared with the same period in the prior year mainly due to an increase in funding.

As a result of the above, and after taking into account the effects from exchange rate changes, cash and cash equivalents at June 30, 2020 were ¥250.7 billion, an increase of ¥51.0 billion from the beginning of the current period.

(4) Issues to Address on Business and Finance
There were no material changes in the outstanding issues for the Company to address during the six months ended June 30, 2020, and no additional issues arose during the period.

(5) Research and Development
The Company’s research and development expenses for the six months ended June 30, 2020 were ¥27.9 billion.

There were no material changes in the Company’s research and development activities during the six months ended June 30, 2020.

3. Material Contracts
There were no material contracts which were approved for conclusion or concluded for the three months ended June 30, 2020.

Notes to Condensed Consolidated Financial Statements
Kubota Corporation and Its Subsidiaries

1. REPORTING ENTITY
Kubota Corporation (the “Parent Company”) is an entity located in Japan. The Parent Company and its subsidiaries (the “Company”) manufacture and sell a comprehensive range of machinery and other industrial and consumer products, including farm equipment, engines, construction machinery, pipe-related products and environment-related products.

The Company manufactures its products not only in Japan, but also in overseas countries, including the United States, France, Germany, China, Thailand, and other countries, and sells its products in Japan, North America, Europe, Asia, and other countries.

2. BASIS OF FINANCIAL STATEMENTS

Compliance with International Financial Reporting Standards ("IFRS")
The condensed consolidated financial statements of the Company are prepared in accordance with International Accounting Standard ("IAS") 34, as permitted by the provision of Article 93 of the Ordinance on Terminology, Forms, and Preparation Methods of Quarterly Consolidated Financial Statements (the “Ordinance”) since the Company is fully qualified as a Specified Company under Designated International Financial Reporting Standards pursuant to the provision of Article 1-2 of the Ordinance. Since they do not include all the information and disclosures required for a complete set of financial statements, they should be read in conjunction with the consolidated financial statements for the year ended December 31, 2019.

Basis of Measurement
Except for the items measured at fair value, such as financial instruments, the Company’s condensed consolidated financial statements are prepared on a historical cost basis.

Functional Currency and Presentation Currency
The condensed consolidated financial statements of the Company are presented in Japanese yen, which is the Parent Company’s functional currency, and figures are rounded to the nearest million yen.

Significant Accounting Judgements, Estimates, and Assumptions
The condensed consolidated financial statements of the Company are prepared by using judgements, estimates, and assumptions relating to the application of accounting policies and reporting of assets, liabilities, revenue, and expenses. Actual results could differ from those accounting estimates and assumptions.

The estimates and assumptions are continually reviewed. The effects of a change in accounting estimates, if any, are recognized in the reporting period in which the change is made and in the future periods.

The significant accounting judgements, estimates, and assumptions made in preparing the condensed consolidated financial statements are consistent with those made in preparing the consolidated financial statements for the year ended December 31, 2019.

The Company expects the infection spread of COVID-19 will settle gradually. However, the negative impact of COVID-19 is expected to continue throughout the year because the pace of a recovery in demand after the resumption of economic activities is expected to be slow and it is expected to take time for a recovery in production, including parts procurement. However there are no significant effect on accounting judgements, estimates, and assumptions.

3. SIGNIFICANT ACCOUNTING POLICIES
The accounting policies applied on the condensed consolidated financial statements are consistent with those applied on the consolidated financial statements for the year ended December 31, 2019.

Income taxes on a quarterly basis are computed using the estimated annual effective tax rate.
4. SEGMENT INFORMATION

The Company engages in various fields of business and industries by providing products and services that are categorized into the following three segments: Farm & Industrial Machinery; Water & Environment; and Other. The Farm & Industrial Machinery segment manufactures and distributes farm equipment, agricultural-related products, engines, and construction machinery. The Water & Environment segment manufactures and distributes pipe- and infrastructure-related products (ductile iron pipes, plastic pipes, valves for public sector, industrial castings, ceramics, spiral welded steel pipes, air-conditioning equipment, and other products), and environment-related products (environmental control plants, pumps, valves for private sector and other products). The Other segment offers a variety of services.

Financial information of the segments is utilized on a regular basis by the chief operating decision-maker in determining how to allocate the Company’s resources and evaluate performance. The segments also represent the Company’s organizational structure, principally based on the nature of products and services.

The accounting policies for the reportable segments are consistent with the accounting policies used in the Company’s condensed consolidated financial statements.

Beginning with the current consolidated fiscal year, in conformity with the change in the business reporting structure of the Company, the amounts related to "Air-conditioning equipment” are reported in the “Water & Environment” segment, whereas they were formerly reported in the “Farm & Industrial Machinery” segment. The information for the prior fiscal year has been retrospectively adjusted to conform to the current fiscal year’s presentation.

Information by reportable segment is summarized as follows:

(Unit: millions of yen)

</table>

(Note)

1. Adjustments include items such as the elimination of intersegment transfers and corporate expenses which are not allocated to any particular reportable segment. The corporate expenses included in Adjustments consist mainly of administration department expenses, basic research expenses, and foreign exchange gains or losses incurred by the Parent Company.

2. The aggregated amounts of operating profit are equal to those presented in the condensed consolidated statement of profit or loss. Please refer to the condensed consolidated statement of profit or loss for the reconciliation of operating profit to profit before income taxes.

3. Intersegment transfers are recorded at values that approximate market prices.
3. Intersegment transfers are recorded at values that approximate market prices.

Revenue recognized from other sources of revenue includes revenue from retail finance and revenue from finance lease using effective interest rate method. The amounts of the above revenue are ¥28,044 million and ¥27,328 million for the six months ended June 30, 2020 and 2019, respectively.
9. EARNINGS PER SHARE ATTRIBUTABLE TO OWNERS OF THE PARENT

The Company adopted a restricted stock compensation plan (the “Plan”) for the Company’s Directors. Among the new shares issued under the Plan, contingently returnable shares are distinguished as participating equity instruments from common shares.

Each common share and participating equity instrument has the same right to profit attributable to owners of the parent.

The numerator and denominator used to calculate basic earnings per share attributable to owners of the parent are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th>2020</th>
<th>2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(Unit: millions of yen)</td>
<td></td>
</tr>

11. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value measurements are classified into the following three levels by inputs used for measurements:

Level 1 – quoted prices in active markets for identical assets or liabilities

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly

Level 3 – unobservable inputs for the assets or liabilities. These are measured using the entity’s own assumptions and inputs that are reasonably available or inputs many market participants use with reasonable confidence.

Financial instruments measured at fair value

</tbody>
</table>
Debt financial assets and equity financial assets classified in Level 1 are measured at fair value using quoted prices for identical assets in active markets.

Derivatives are classified in Level 2 since they are measured at fair value using observable market inputs obtained from major international financial institutions.

Equity financial assets classified in Level 3 are unlisted equity securities and measured at fair value using methods such as the comparable company comparison method with the earnings before interest and tax ("EBIT") ratio (from -5.2 to 23.4), etc. As the EBIT ratio increases (decreases), the fair values on those equity financial assets increase (decrease).

Transfers between levels are recognized at the end of the reporting periods when such transfers occur. There were no significant transfers of financial instruments between the levels for the six months ended June 30, 2020 and 2019.

The following table presents reconciliation of financial instruments classified in Level 3:

<table>
<thead>
<tr>
<th>Six months ended June 30:</th>
<th>2020</th>
<th>2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balance at the beginning</td>

<td>¥3,490</td>
<td>¥3,087</td>
</tr>
<tr>
<td>the period</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(Note)

* Gains or losses are those related to unlisted equity securities held as of June 30, 2020 and 2019, and included in net change in fair value of financial assets measured at fair value through other comprehensive income in the condensed consolidated statement of comprehensive income.

Financial instruments measured at amortized cost

The following table summarizes the carrying amount and fair value of financial instruments measured at amortized cost:

<table>
<thead>
<tr>
<th></th>
<th>June 30, 2020</th>
<th>December 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying</td>
<td>Fair value</td>
</tr>
<tr>
<td>Finance receivables:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Retail finance receivables</td>
<td>¥754,638</td>
<td>¥762,514</td>
</tr>
<tr>
<td>Finance lease receivables</td>
<td>275,214</td>
<td>324,115</td>
</tr>
<tr>
<td>Long-term trade accounts receivable</td>
<td>78,336</td>
<td>83,154</td>
</tr>
<tr>
<td>Bonds and borrowings</td>
<td>957,120</td>
<td>968,935</td>
</tr>
</tbody>
</table>

The fair value of finance receivables, long-term trade accounts receivable, and bonds and borrowings is stated at the present value of future cash flows discounted by the current market rate. Long-term trade accounts receivable in the above table includes the current portion, which is included in trade receivables in the condensed consolidated statement of financial position.

The carrying amounts of cash and cash equivalents, trade receivables (excluding the current portion of long-term trade accounts receivable), other financial assets (excluding debt financial assets measured at fair value, equity financial assets, and derivatives), trade payables, and other financial liabilities (excluding lease liabilities and derivatives) approximate their fair values due to their short-term maturity.
12. CONTINGENT LIABILITIES

Legal Proceedings
Since May 2007, the Company has been subject to 36 asbestos-related lawsuits in Japan, which were filed against the Company or defendant parties consisting of the Japanese government and asbestos-related companies including the Company. The total claims for compensation of all 36 lawsuits aggregate ¥29,361 million, which relate to 766 construction workers who suffered from asbestos-related diseases.

23 among 36 lawsuits were compiled into seven cases, which were decided in favor of the Company, but the plaintiffs appealed the court ruling of these seven cases. The appellate court ordered the Company to pay compensation damages of ¥7 million under the judgement. Apart from the above case, the four appellate courts ruled in favor of the Company, but the plaintiffs of the four cases appealed to the supreme courts.

Since the above cases will continue until an ultimate outcome is reached and the similar asbestos-related cases in Japan are still pending and have not been finally concluded, the Company is not able to use them as a reference in predicting the ultimate outcomes of the above cases.

The Company reviews the status of each lawsuit on a regular basis by utilizing consultations of outside legal counsel, however, due to the above reasons, the Company believes that it is currently unable to predict the ultimate outcome of all lawsuits.

The Company does not have any cost-sharing arrangements with other potentially responsible parties, including the government for these 36 lawsuits.

Matters Related to the Health Hazards of Asbestos
The Company’s plant in Amagasaki, Hyogo Prefecture, Japan, previously produced asbestos-related products. The Company decided to make voluntary consolation payments to certain residents in June 2005, and established a relief payment program in place as a voluntary consolation payment to the residents in April 2006. With regard to the current and former employees who suffered and are suffering from asbestos-related diseases, the Company provides compensation which is not required by law, but is made in accordance with the Company’s internal policies.

In its effort to develop an estimate of future asbestos-related expenditures, the Company has considered all available data, including a time series of historical claims and payments, the rate of incidence of asbestos related disease, and public information related to asbestos-related disease. However the health hazards of asbestos tend to have a longer incubation period, and therefore reliable statistics related to the rate of incidence in asbestos-related disease are not available to the Company. Furthermore, since there have not been any asbestos-related events impacting other companies in Japan for which all claims have been finalized, for estimation of the rate of incidence, the Company believes it is not possible to decide the range of the final possible outcome in the future. For these reasons, the Company believes it is not possible to reliably estimate the amount of its ultimate liability, and the Company does not accrue on this contingency.

The Law for the Relief of Patients Suffering from Asbestos-Related Diseases (the “New Asbestos Law”) was established by the Japanese government, and the contributions made by business entities include a special contribution by the companies which operated a business closely related to asbestos, and commenced from the year ended March 31, 2008.

The Company accrues asbestos-related expenses when the Company receives the related claims, which include possible payments to certain residents who lived near the Company’s plant and current and former employees, and the special contribution in accordance with the New Asbestos Law. The accrued balances for those expenses are ¥313 million and ¥143 million at June 30, 2020 and December 31, 2019, respectively. The asbestos related expenses recognized for the six months ended June 30, 2020 and 2019 were ¥341 million and ¥597 million, respectively.
