

Information Security Countermeasure Standard for Our Suppliers

February 2025
KUBOTA Corporation

1. Introduction

This Countermeasure Standard shows information security countermeasure items which ask suppliers that are shared classified information owned by KUBOTA Corporation and its subsidiaries and affiliates (hereinafter referred to as "Our Company") in promoting CSR management.

Through the proper management of confidential information, we aim to achieve stable business continuity and the continuous synergistic development of the Kubota Group, its suppliers and society.

We would like to take this opportunity to express our gratitude for your cooperation towards our efforts and we ask for your continued understanding and cooperation.

2. Scope of application

Scope of application of this Countermeasure Standard shall be in accordance with the scope of application of "Kubota Group Supplier Code of Conduct".

3. What is classified information?

Classified information generally means information disclosed by documents, etc. (including data information recorded magnetically or optically) which are agreed to be confidential, or information disclosed orally after notifying its confidentiality.

4. Target

This Countermeasure Standard shall not only include classified information shared with us but shall also include classified information created using that classified information.

In addition, the format of classified information shall not only include paper and electronic media but shall also include intangible assets, such as items (mold, etc.), knowhow and technology which are created by using the classified information.

5. Information Security Countermeasure Standard

These guidelines were prepared with reference to the "JAMA/JAPIA Cybersecurity Guidelines" etc. and are based on measures to reduce the risk of information security incidents as well as measures to mitigate the impact of such security incidents through rapid recovery.

The Information Security Countermeasure Standard required for suppliers is shown below.

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
1 Policies	As a company, demonstrate basic concepts and policies regarding security and enhance awareness of information security within the organization	An in-house information security policy shall be established and communicated within the organization	1	Required	An in-house information security policy is established	•An in-house information security policy shall be established and documented
			2	Required	The details regarding the in-house information security policy are checked and reviewed as necessary	[Rule(s)] •Details are checked and reviewed as appropriate based on environmental changes both inside and outside the company [Frequency] •The details regarding the information security policy are checked and reviewed as necessary –Once or more per year *There will be a separate, prompt response if a significant change occurs
			3	Required	The information security policy is communicated within the organization	[Rule(s)] •The in-house information security policy shall be in a format that is easily accessible [Applies to] •Executives, employees, outside employees (including temporary employees, etc.) [Frequency] •The in-house information security policy shall be communicated within the organization regularly and whenever revised
2 Rules for handling confidential information	Prevent the leakage of confidential information by defining rules for handling confidential information and communicating those rules within the organization	In-house rules to ensure security for confidential information shall be defined	4	Required	Non-disclosure rules in the company are established and enforced	[Rule(s)] •Non-disclosure rules shall be established and documented •Explanations regarding non-disclosure rules are provided when new employees (including outside employees) join the company •Confidential information shall not be carried outside the company when an employee resigns or their contract date expires [Applies to] •Executives, employees, outside employees (including temporary employees, etc.)
			5	Required		[Rule(s)] •A letter of commitment for non-disclosure shall be submitted (excluding outside employees)
			6	Required	A non-disclosure agreement is entered into with the dispatching/transferring company for temporary and transferred employees	[Rule(s)] •For non-disclosure, a statement shall be included stating that information obtained in the course of business will not be divulged [Timing] *When to enter into a contract for confidentiality obligations •Before starting business

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			7	Required	The necessary confidential information, IT equipment/devices, etc., is collected when an employee resigns or their contract date expires	[Standards] <ul style="list-style-type: none"> •A checklist or form shall be created for the list of items to be collected •Procedures shall be prepared and utilized that prevent collection omissions •It shall be checked that collection is done in accordance with the procedure, and the procedure shall be corrected as necessary [Items to be collected] <ul style="list-style-type: none"> –Information (printed materials, storage media) –IT equipment/devices (PCs, smart devices, USB memory stick or other storage media) –Access rights (ID, keys) *In addition to the above, each company shall determine what items will be necessary to collect [Confirmation of collection status, frequency of procedure correction] <ul style="list-style-type: none"> –Once or more per year
			8	Required	Rules for the usage of IT equipment/devices employed for business operations are defined and communicated within the organization (including rules for personal devices [BYOD])	[Rule(s)] <ul style="list-style-type: none"> •Rules for the usage of IT equipment/devices (computers, servers, communications equipment, storage media, smart devices, etc.) shall be established that include procedures for starting/ending usage, items to be observed/prohibited during usage, and procedures for when such equipment/devices are lost •Rules for the usage of IT equipment/devices shall be in a format that is easily accessible [Applies to] <ul style="list-style-type: none"> •Executives, employees, outside employees (including temporary employees, etc.) [Frequency] <ul style="list-style-type: none"> •Rules shall be communicated within the organization regularly and whenever revised
3 Compliance	As a company, comply with laws regarding information security	In-house rules shall be established to ensure compliance with laws regarding information security (Examples of laws: Act on the Protection of Personal Information, Unfair Competition Prevention Act)	9	Required	To ensure compliance with laws regarding information security, rules are established and education/communication are provided within the organization	[Rule(s)] <ul style="list-style-type: none"> •In-house rules shall be established to ensure compliance with laws regarding information security •Established in-house rules shall be communicated within the organization and education provided on those rules [Applies to] <ul style="list-style-type: none"> •Executives, employees, outside employees (including temporary employees, etc.) [Frequency] <ul style="list-style-type: none"> (Training) •Whenever a new employee joins the company and once per year (Communication within the organization) •Rules shall be communicated within the organization regularly and whenever revised

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			10	Required	For companies with personal information, there are in-house rules stipulated that are specifically for the handling of personal information	[Rule(s)] <ul style="list-style-type: none"> • In-house rules shall be established regarding the handling of customer personal information [Details for clarification] • Establish a personal information management system • Notify and clearly indicate purpose of use at the time of acquisition • Use within the scope of consent of the individual • Do not provide to a third party without the consent of the individual • Requests for disclosure, correction, suspension of use, deletion, etc., by the individual shall be responded to • Rules for the handling of personal information shall be established • Information shall be collected regarding information security laws and regulations such as the Act on the Protection of Personal Information, GDPR, and Unfair Competition Prevention Act • Procedures for responding to information leaks • Established in-house rules shall be communicated within the organization and education provided on those rules [Applies to] <ul style="list-style-type: none"> • Those in charge of handling personal information
			11	Required	Rules are reviewed as necessary in accordance with changes to laws	[Frequency] <ul style="list-style-type: none"> • Once per year, or when a serious information security incident/accident occurs
			12	Required		[Frequency] <ul style="list-style-type: none"> • Compliance with in-house rules are checked and correction is carried out as necessary
4 System (Normal)	Clarify systems and roles for information security and thoroughly enact and reinforce measures for cybersecurity and protecting against data leakage	A system for managing information security risks for use in normal situations shall be constructed to enable the collection and sharing of information without incident	13	Required	The system, roles and responsibilities (incl. information security officers) during normal situations are clarified	[Rule(s)] <ul style="list-style-type: none"> • The roles and responsibilities of the executive that presides over information security (CISO, etc.) and those of the department in charge of information security shall be clarified • A list of contact persons shall be established
			14	Required		[Rule(s)] <ul style="list-style-type: none"> • Understanding that information security risks have a significant impact on management, a system shall be established that enables systematic management decisions
			15	Required	The system for normal situations is reviewed regularly or as necessary	[Frequency] <ul style="list-style-type: none"> • Once per year, or when a serious information security incident/accident occurs • Or, when changes are made to the department or officer responsible for protecting/managing various information, including customer information, due to company reorganization, etc.

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
5 System (adverse situations)	Clarify systems and roles for information security and minimize damage in the event of an incident/ accident to enable recovery to normal operations as quickly as possible	A system for responding to information security incidents/accidents and its corresponding officers shall be clarified	16	Required	New methods of cyberattacks or leaking information are detected and corresponding security measures are shared with departments in the company	[Rule(s)] •In accordance with the system for normal situation, examples of information security incidents/accidents and corresponding security measures shall be shared with departments in the company [Applies to] •Executives, employees, outside employees (including temporary employees, etc.) [Frequency] •Once per year, or when a serious information security event/incident occurs either inside or outside the company
			17	Required	A system is in place for monitoring and analyzing cyberattacks and signs	[Rule(s)] •Build a system that will utilize public and non-public information regarding cyberattacks and vulnerabilities •Allow for detection of cyberattacks and signs using correlation analysis, and build a system that can derive the appropriate responses from analysis results *Correlation analysis: A method for finding signs and traces of information security incidents/accidents by analyzing complex logs, etc.
			18	Required	A system for responding to information security incidents/ accidents and its corresponding roles and responsibilities is clarified	[Rule(s)] •The roles and responsibilities of the executive that presides over information security (CISO, etc.) and those of the department in charge of information security shall be clarified •Criteria for information security incidents/accidents shall be clarified, as shall contact persons inside/outside the company and contact routes thereof
			19	Required	Information security incidents/accidents that occur are responded to and an overview of the accident and its impact/response measures are recorded	[Rule(s)] •An initial response flow for information security incidents/accidents shall be established •A reporting format for information security incidents/accidents shall be established
			20	Required	The system for adverse situations is reviewed regularly or as necessary	[Frequency] •Once per year, or when a serious information security incident/accident occurs, etc.

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
6 Procedures in adverse situations	Same as above	Positioning information security incidents/accidents in the company's business continuity plan or emergency response plan	21	Optional	A business continuity plan or emergency response plan is created for the company that includes information security incidents/accidents	[Standards] •Devise a countermeasure plan based on the response history for security incidents/accidents and risk assessment results •It shall be confirmed that the measures are implemented in accordance with the countermeasure plan [Details of the countermeasure plan] -Descriptions of measures (what kinds of measures should be taken for what events) -Schedule (start and end times and the period required for each process of the countermeasure) [Countermeasure progress confirmation] -Once or more per year
			22	Optional	The business continuity plan or emergency response plan for the company that includes information security incidents/accidents is checked regularly and revised as necessary	[Frequency] •Once or more per year
		Procedures for addressing information security incidents/accidents at an early stage shall be clarified	23	Required	The scope of information security incidents/accidents is clarified and communicated throughout the company	[Rule(s)] •The following scopes shall be clarified [Details for clarification] -Events treated as accidents/incidents -Accident/incident levels [Applies to] •Communicating to executives, employees, temporary employees, and seconded employees
			24	Required	Procedures (initial procedures, system recovery procedures, etc.) for responding to information security incidents/ accidents are defined	[Rule(s)] •If necessary, the organization shall include the following response procedures (1) Procedures for reporting discovery of incidents/accidents, (2) Initial procedures, (3) Investigation/response procedures, (4) Recovery procedures, (5) Final reporting procedures
			25	Optional	Procedures (initial procedures, system recovery procedures, etc.) for responding to information security incidents/accidents are checked regularly and revised as necessary	[Frequency] •Once per year and when a serious incident/accident occurs

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
7 Daily education	Have employees understand the risks surrounding malware and confidential information, as well as the correct handling methods thereof, in order to prevent information security incidents/accidents	Employees shall be educated to be aware of risks	26	Required	Procedures for responding to malware infections are defined	[Rule(s)] • If necessary, the organization shall include the following procedures in responding to malware infections (1) Procedures for reporting discovery of incidents/accidents, (2) Initial procedures, (3) Investigation/response procedures, (4) Recovery procedures, (5) Final reporting procedures
			27	Required	Procedures for responding to malware infection are checked regularly and revised as necessary	[Rule(s)] • The content of education/training shall be reviewed based on attack trends, world trends, etc. [Frequency] • Once or more per year
			28	Required	In-house education is provided regarding malware infections via email	[Rule(s)] • Education on preventing malware via email shall be provided by distributing/posting educational materials, e-Learning, or group education, etc. • Review the content of training and improve the content of the next training [Applies to] • Executives, employees, outside employees (including temporary employees, etc.) who use email [Frequency] • Whenever a new employee joins the company and once or more per year
			29	Required	In-house education is provided regarding internet connections	[Rule(s)] • Education on preventing malware during online browsing shall be provided by distributing/posting educational materials, e-Learning, or group education, etc. • Review the content of training and improve the content of the next training [Applies to] • Executives, employees, outside employees (including temporary employees, etc.) who use the internet [Frequency] • Whenever a new employee joins the company and once or more per year
			30	Required	Education is provided regarding the handling of information based on confidentiality classification	[Rule(s)] • Education regarding definitions of confidentiality classifications and the handling thereof shall be provided by distributing/posting educational materials, e-Learning, or group education, etc. • Review the content of training and improve the content of the next training [Applies to] • Executives, employees, outside employees (including temporary employees, etc.) [Frequency] • Whenever a new employee joins the company and once or more per year

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			31	Required	Training on targeted emails is being implemented	[Rule(s)] <ul style="list-style-type: none"> • Training on targeted emails shall be implemented • Include in the training content what to do if an email is opened • Review the methods and content of training and improve the content of the next training [Applies to] <ul style="list-style-type: none"> • Those who use email [Frequency] <ul style="list-style-type: none"> • Once or more per year
			32	Required	Education is provided to information security managers in each department regarding measures to take and management methods within the organization	[Rule(s)] <ul style="list-style-type: none"> • Education shall be provided regarding measures to take and management methods within the organization • Review the content of training and improve the content of the next training [Applies to] <ul style="list-style-type: none"> • Information security managers or promoters in each department *If an information security manager has not been appointed, the department manager [Frequency] <ul style="list-style-type: none"> • Once or more per year
			33	Required	Opportunities are provided for corporate management to understand their roles and responsibilities with regard to information security	[Rule(s)] <ul style="list-style-type: none"> • A forum is provided for corporate management to understand their roles and responsibilities • Review the content of explanations and improve for the next iteration [Applies to] <ul style="list-style-type: none"> • Corporate management, executives [Frequency] <ul style="list-style-type: none"> • Once or more per year
			34	Required	Company-wide enlightenment activities are carried out	[Rule(s)] <ul style="list-style-type: none"> • Opportunities shall be provided to reaffirm the importance of information security throughout the company [Applies to] <ul style="list-style-type: none"> • Executives, employees, outside employees (including temporary employees, etc.) [Frequency] <ul style="list-style-type: none"> • Once or more per year

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			35	Required	Enlightenment activities are carried out for particularly important risks and rules in each workplace	[Rule(s)] •Reminders shall be given regarding particularly important rules and risks in the activity units (department, section, etc.) set by each company •Review the content of enlightenment and improve the next iteration [Applies to] •Employees and outside employees (temporary employees, etc.) whose understanding of workplace-specific risks and compliance with rules are especially important [Frequency] •Once or more per year
			36	Required	Have a concrete grasp of training and enlightenment implementation status with numerical values, etc.	[Rule(s)] •Have a concrete grasp of the attendance and level of understanding for training and enlightenment sessions with numerical values, etc. [Target education, enlightenment] •Education and enlightenment judged to be important by each company [Frequency] •Once or more per year
			37	Optional	Security education is provided to personnel involved in the procurement of information systems so that they can instruct suppliers	[Rule(s)] •Education shall be provided via distributing/posting educational materials, e-Learning, group education, etc., in order for personnel to acquires skills for security guidance tailored to the characteristics of suppliers [Applies to] •Personnel related to procurement of information systems [Frequency] •Once or more per year
	Make advanced preparations for prompt and appropriate responses aimed at preventing further damage to enable prompt recovery when an information	Education/training on information security incidents/accidents that have an impact within or across organizations, and methods of minimizing their impact, shall be	38	Required	Education/training for responding to information security incidents/accidents is provided	[Rule(s)] •Education and training on responding to information security incidents/accidents shall be provided by distributing/posting educational materials, e-Learning, or group education, etc. [Applies to] •Executives, employees, outside employees (including temporary employees, etc.) [Frequency] •Whenever a new employee joins the company and once or more per year

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
8 Information security requirements between companies	security incident/accident occurs	provided	39	Optional	Education/training for responding to information security incidents/accidents across organizations is provided	[Rule(s)] •Education and training on responding to information security incidents/accidents across organizations shall be provided by distributing/posting educational materials, e-Learning, or group education, etc. [Applies to] •Security-related departments [Frequency] •Once or more per year
			40	Required	Education/training content is reviewed as necessary	[Frequency] •Before/after education and training, or once or more per year
	Prevent the leakage of confidential information in the supply chain and enable prompt response to accidents	Information security requirements for the supply chain shall be clarified	41	Required	The flow of goods and data is shared with suppliers	[Rule(s)] •Must be able to identify important suppliers •Must be able to identify the flow of goods and data •An overview of transactions shall be illustrated and shared with the supplier [Applies to] •Suppliers with which business occurs
			42	Optional	Have a grasp of the status of security measures of business partners that handle important confidential information	[Rule(s)] Grasp the state of countermeasures of business partners by referring to the following examples: •Create a checklist and receive answers from business partners •Visit business partners and carry out inspections [Target companies] •Subsidiaries, suppliers, etc., that provide and share important confidential information of the company Example: Companies that share “top secret” confidential information [Frequency] •Once or more per year
			43	Required	Confidential information, access rights, etc., are collected or disposed of at the end of a contract	[Rule(s)] •A checklist for confidential information, access rights, etc., to be collected shall be created •Use the checklist at the end of a contract to collect confidential information, access rights, etc. •Confirm that collection or disposal has been carried out without omission, and make corrections as necessary [Target companies] •Subsidiaries, suppliers, etc., that provide and share confidential information [Frequency] •Once or more per year

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			44	Required	Methods of handling confidential information between companies are clarified	[Rule(s)] •Methods of handling confidential information shall be exchanged before starting business [Applies to] •Companies that share confidential information
			45	Optional	Regular checks are made to see if there are any issues with how confidential information between companies is handled and revisions are made as necessary	Frequency] •Once or more per year
			46	Required	Roles and responsibilities when an information security incident/accident occurs are clarified with other companies	[Rule(s)] •When sharing confidential information, the roles and responsibilities of each company when an information security incident/accident occurs shall be documented
			47	Optional	The text for roles and responsibilities with other companies in the event of an information security incident/accident is checked regularly and revised as necessary	[Frequency] •Once or more per year
			48	Required	Have a grasp of the state of handling of other company's important confidential information in the company	[Rule(s)] •The history of handling other company's important confidential information in-house shall be recorded and stored •Confirm that recording and storage is done appropriately, and make corrections as necessary [Frequency of recording, checking storage status, correcting] •Once or more per year
9 Access rights	Prevent unauthorized access to confidential areas or systems due to inadequacies in access right settings	Access rights (room and system access rights) shall be managed appropriately	49	Required	Rules for managing access rights (room and system access rights) in the event of personnel transfers are defined	[Rule(s)] •Management rules shall be defined to include the following: •An application/approval system shall be used for issuing, changing, and revoking access rights •Granted room entry permissions and access rights shall be limited to the scope necessary •Methods of taking inventory for room entry rights and access rights shall be defined •Applications and ledgers for granted room entry permissions and access rights shall be managed [Applies to] •Systems used for business operations and user IDs for logging onto computers •Locations or rooms in which considerations for confidentiality are required

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			50	Required		[Rule(s)] <ul style="list-style-type: none"> •For systems handling important information, clarify the conditions for granting access rights •Setting of access rights should be carried out under strict management by clarifying the requirements and settings for the system administrator. •Systems handling important information should have an environment in which authority is not concentrated on individuals, such as by separating the authority of those using information and system administrators. •Monitor the operation/usage state for systems handling important information.
			51	Required	Access rights are issued, changed, disabled, or revoked in accordance with management rules	[Rule(s)] <ul style="list-style-type: none"> •Inspections of the compliance status of the management rules defined in No. 49 shall be performed
			52	Required	An inventory of access rights is taken regularly or as necessary	[Rule(s)] <ul style="list-style-type: none"> •In accordance with the rules defined in No. 49, an inventory of access rights shall be taken regularly or as necessary
			53	Required	Access logs are securely stored and managed in an access-controlled state	[Rule(s)] <ul style="list-style-type: none"> •Logs are kept for an appropriate period so that matters required by laws and regulations can be met. •To protect logs from threats, access restrictions, etc., are applied to the items and systems that store logs
10 Management of information assets (information)	Appropriately manage information assets to prevent the leakage of confidential information	Confidentiality classifications for information assets shall be set and understood, and information managed in accordance with those confidentiality classifications	54	Required	Management rules are defined for information based on confidentiality classification	[Rule(s)] <ul style="list-style-type: none"> •Management rules shall be defined to include the following: •Identification of confidentiality •Determinations of levels for confidentiality classifications and their application •Classification-based handling methods •Handling area classifications and restrictions [Applies to] <ul style="list-style-type: none"> •Information assets (information)
			55	Required	Management rules for information based on confidentiality classification are reviewed regularly or as necessary	[Rule(s)] <ul style="list-style-type: none"> •The details of management rules are checked and improved as necessary [Frequency] <ul style="list-style-type: none"> •Once or more per year
			56	Required	A list is created of information assets (information) with high confidentiality classifications	[Rule(s)] <ul style="list-style-type: none"> •This list shall include the target information, administrator name, department name, storage location, storage period, persons disclosed to, contact persons, etc. [Target information] <ul style="list-style-type: none"> •Information assets applicable to a high level of confidentiality among the confidentiality classifications defined in No. 54

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
11 Management of information assets (equipment/devices)	Appropriately manage IT assets to reduce the risks associated with information security incidents/accidents and shorten response times when an information security accident occurs	IT equipment/devices owned by the company and information (version information, administrator, administrating department, location installed, etc.) on the OS and software used by the equipment/device shall be managed appropriately	57	Required	The created list of information assets (information) with high confidentiality classifications is reviewed regularly or as necessary	[Rule(s)] • The details of the list are checked and corrected as necessary [Frequency] • Once or more per year
			58	Required	Management of information assets (information) is performed in accordance with management rules based on confidentiality classification	[Rule(s)] • Inspections of the compliance status of the management rules defined in No. 54 shall be performed and corrective actions taken in the event irregularities or violations are found [Frequency] • Once or more per year
			59	Required	Management rules for IT equipment/devices, OS, and software are defined based on importance	[Rule(s)] • Management rules shall be defined that include equipment/device adoption, installation, network connections, application of security patches, etc.
			60	Required	A list is created of IT equipment/devices and information (version information, administrator, administrating department, location installed, etc.) on OS and software	[Rule(s)] • A list of information for IT equipment/devices, OS and software shall be created that includes version information, administrators, administrating departments, locations installed, etc.
			61	Required	A list of IT equipment/devices and information (version information, administrator, administrating department, location installed, etc.) on OS and software is reviewed regularly or as necessary	[Frequency] • Once or more per year
			62	Required	Management of information assets (equipment/devices) is performed in accordance with management rules based on importance	[Rule(s)] • Management shall be performed in accordance with management rules defined in No. 59. Corrective actions shall be taken in the event irregularities or violations are found [Frequency] • Once or more per year
			63	Optional		[Rule(s)] Regularly check that devices and installed software are genuine by using serial numbers and hash values according to importance [Frequency] • Once or more per year (when taking inventory of assets, etc.)

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
12 Risk response	Identify information asset security risks and take organizational measures as a company to minimize impacts to operations	Measures for information security risks shall be taken within the organization (organizational operations also include outsourced operations)	64	Required	Unauthorized installation of applications on smart devices is restricted, and installation status is checked regularly	[Rule(s)] Applications that can be installed are defined, and installation status is checked regularly [Applies to] –Company–supplied smart devices [Frequency of check] –Once a year
			65	Required	At the time of disposal (including at the end of a lease), the data on the storage medium is erased	[Rule(s)] •When disposing of information assets (equipment) (including at the end of a lease), delete the data so that it cannot be restored •Keep a record of having erased the storage area of information assets (equipment) or a vendor disposal certificate *Disc formats are not possible as data may be recovered [Applies to] –Servers, company–supplied client PCs, smart devices, external storage media
			66	Required	Risks are identified when the three elements of information assets—confidentiality, integrity, and availability—cannot be ensured	[Rule(s)] •The impact on operations when an information security incident/accident occurs to the target information asset shall be understood in terms of scope of impact and frequency of occurrence [Applies to] •Information assets identified in No. 56 [Viewpoints] –External threats –Company vulnerabilities *Consider threats and vulnerabilities caused by business partners as necessary –Value of information assets [Methods] –Determine the target information and information systems –Establish evaluation rules for each viewpoint and risk level rules that take those into consideration –For each piece of information and information system, determine the risk level from the evaluation from each viewpoint [Frequency] •When reviewing important information assets or once or more per year
			67	Optional	Development standards are established that describe security requirements and they are regularly reviewed	[Rule(s)] •Security development standards shall be established for information systems •Check that development is proceeding in accordance with development standards •Regularly review the content of the development standards [Frequency of review] •Once a year

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			68	Required	Impacts on operations and their measures are reported to management as necessary and shared with internal departments involved in security operations	[Rule(s)] <ul style="list-style-type: none"> •Methods of measures for the impact on operations understood in No. 66 and plans thereof shall be formulated and reported/shared •Any instructions received from executives when reporting shall be shared with relevant departments [Applies to] <ul style="list-style-type: none"> •Chief Information Security Officer, related departments [Frequency] <ul style="list-style-type: none"> –Once or more per year
			69	Required	Management of measures for impacts on operations are performed in accordance with formulated plans	[Rule(s)] <ul style="list-style-type: none"> •In addition to appropriately implementing the measures and plans created in No. 68, it shall be confirmed that any impact to operations was reduced, and corrective actions taken for any irregularities that are discovered [Applies to] <ul style="list-style-type: none"> •Impact to information asset operations [Frequency] <ul style="list-style-type: none"> •Once or more per year
			70	Required	A list is created for the information exchanged with each company and the methods used (methods of exchanging information, such as for receiving/sending orders)	[Rule(s)] <ul style="list-style-type: none"> •This list shall include information assets exchanged/used during transactions, as well as how they are handled, and mutually understood by the business partner [Applies to] <ul style="list-style-type: none"> •Business partners with which important information assets (such as the highly confidential information assets defined in No. 54) are shared [Frequency] <ul style="list-style-type: none"> •When starting business transactions or when changes are made to information exchanged and methods used
13 Understanding details of business transactions and methods	Prevent information leakages, etc., during the course of business transactions by clarifying what methods are used to exchange information assets and with what business partners	Information assets exchanged over the course of business transactions with each business partner, as well as the methods used for such transactions, shall be understood	71	Optional	The list of information exchanged with each company and the methods used (methods of exchanging information, such as for receiving/sending orders) is reviewed regularly or as necessary	[Frequency] <ul style="list-style-type: none"> •Once or more per year

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
		Managing information security risks regarding the procurement of IT equipment	72	Optional	Security requirements for the procurement of IT equipment are established and communicated within the organization	<p>[Rule(s)]</p> <ul style="list-style-type: none"> •A list shall be made of the security requirements for procuring equipment •Security requirements can be easily confirmed when procuring equipment <p>[Applies to]</p> <p>[Equipment]</p> <ul style="list-style-type: none"> •IT equipment connected to the internal network <p>[Communication]</p> <ul style="list-style-type: none"> •Executives, employees, outside employees (including temporary employees, etc.) <p>[Frequency]</p> <ul style="list-style-type: none"> •Information shall be communicated within the organization regularly and whenever the security requirements for procuring equipment are revised
			73	Optional	Security requirements for the procurement of IT equipment are shared with the provider, and results of the evaluation at the time of purchase are recorded and stored	<p>[Rule(s)]</p> <ul style="list-style-type: none"> •Security requirements are clearly stated in the purchase contract, etc. •When procuring equipment, security requirements are evaluated and the results are stored •There are regular checks confirming the storage of check results <p>[Applies to]</p> <p>IT equipment connected to the company network</p> <p>[Frequency of checking storage status]</p> <p>Once or more per year</p>

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
14 Understanding the statuses of external connections	Ensure safety and trust when using external information systems, while enabling prompt response to information security incidents/accidents	For relations with affiliated organizations (including suppliers, etc.), understand the communication network structure for your own organization and monitor the status of cooperation with other organizations as well as the flow of data	74	Required	Network and data flow diagrams are created, and communication with affiliated organizations (including suppliers, etc.) are monitored	[Standard] • Network diagrams shall be created [Scope] – Networks where the company's own IT equipment/devices exists [Frequency of review] – Once or more per year <Addition> [Standard] • Data flow diagrams shall be created [Scope] – Data within the company exchanged over the network between affiliated organizations [Standard] • Communication with affiliated organizations shall be monitored [Scope] – Data exchanged on the network between affiliated organizations [Frequency] – Always
			75	Required	Network and data flow diagrams are reviewed regularly or as necessary	[Frequency] – Once or more per year
		External information systems (such as those of customers, subsidiaries, affiliated companies, contractors, cloud services, external information services) shall be clarified and their usage status managed appropriately	76	Required	Rules for using external information systems connected to organizational assets are defined	[Rule(s)] • Usage rules shall be defined to include the following: • Non-disclosure agreements are entered into with entities that connect with external information systems • Security requirements for using external information systems are defined • Service details are checked to conform that security requirements for using external information systems are met and evidence of the approval thereof is saved
			77	Required	A list of external information systems that are used is created	[Rule(s)] • A list of external information systems shall be created
			78	Required	The list of external information systems is reviewed regularly or as necessary	[Rule(s)] • In addition to regularly taking inventory, new external information systems shall be added to the list and those for which usage has stopped removed from the list [Frequency] • Once or more per year and whenever use of new system starts or use of a system stops

			133	Required	Emails sent outside the company are audited, and users are informed that auditing is taking place as a way to combat internal fraud	[Rule(s)] Implement email auditing and communicate within the organization that auditing is taking place [Applies to] -Mail sent outside the company [Targets for communication] -Executives, employees, temporary employees, and seconded employees
			134	Required	Prohibitions and restrictions on the use of websites and web applications are clarified and communicated within the organization	[Rule(s)] The following shall be clarified and communicated within the organization: -Do not post company information on social media without permission -Do not upload business data to web services without permission [Targets for communication] -Executives, employees, temporary employees, and seconded employees
			135	Required	Establish and disseminate usage rules for sharing files with affiliated companies and business partners (including the use of cloud services)	[Rule(s)] The following shall be clarified and communicated within the organization: -When sharing files outside the company, share only with trusted parties -File transfers outside the company using a method that does not leave a transmission history are prohibited *File sharing: Uploading a file to a specific location and allowing a specific individual to access the file *File transfer: Sending a file directly to a specific individual [Targets for communication] -Executives, employees, temporary employees, and seconded employees
22 Malware countermeasures	Prevent information leakage, unauthorized modifications, and system stoppages due to malware infections	Anti-malware measures shall be implemented to quickly detect security abnormalities	136	Required	Software (anti-virus software) is used on computers and servers to detect malware and provide notifications	[Rule(s)] •Anti-virus software shall be used on each computer and server •Scans shall be performed by specifying scan scopes and frequencies appropriate for the equipment/device [Applies to] •All computers and servers connected to networks
			137	Required	Anti-virus software pattern files are updated regularly	[Applies to] •Same as No. 136 [Pattern file update frequency] •Once or more on days computers/servers are booted and used

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			138	Required	A behavior tracking system has been introduced that allows for the acquisition of detailed histories at endpoints and remote response after malware infection	[Rule(s)] •An endpoint countermeasure system (EDR Anti-Virus software or Next Generation Anti-Virus (NGAV) software) shall be introduced [Applies to] –Company-supplied client PCs –Servers [System requirements] –Can inspect suspicious files and signs of suspicious files by utilizing AI and machine learning, etc., as well as file characteristics and behavior –Can unified management of detection results at all devices, etc. –Can obtain terminal operation history, program execution history, registry change history –Can remotely investigate terminals –Can remotely disconnect from the network –Can recover after infection
			139	Required	Malware checks are implemented at email gateways to prevent malware infection by email	[Rule(s)] •A malware check function shall be introduced at the email gateway
			140	Required	Extension restrictions are enforced by a system to prevent malware intrusion from email attachments	[Rule(s)] •A function restricting specific extensions shall be introduced at the email gateway
			141	Required	Malware checks are implemented at web gateways to prevent malware infection by viewing malicious websites	[Rule(s)] •A malware check function shall be introduced at the web gateway
23 Detecting unauthorized access	Prevent information leakage, unauthorized modifications, and system stoppages due to unauthorized	Build a system to constantly monitor unauthorized access to the network	142	Required	A system is introduced to constantly monitor the content of communications and detect/block and notify regarding unauthorized access in real time	[Rule(s)] •A system shall be introduced that detects/blocks unauthorized access in real time [Applies to] •Communications from the internet to the company •Communications from within the company to an unauthorized server [Introduction location] –Boundaries between internal and external networks

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
	access and intrusions	Logs shall be acquired so that intrusion and leak routes can be investigated in the event of a security incident or accident	143	Required	Logs required for investigation when an incident occurs are being obtained	[Rule(s)] •The following logs shall be obtained and stored [Logs to be obtained (retention period)] –Email transmission/reception logs (6 months) Items: Date and time, destination email address, sender email address –Firewall logs (6 months) Items: Date and time, source IP address, destination IP address –Proxy server logs (6 months) Items: Date and time, requester IP address, URL –Remote access logs (6 months) Items: Date and time, connection source IP address, user ID –Authentication server logs (6 months) Items: Date and time, connection source IP address, user ID, success/failure –Endpoint (PC, server) operation logs (6 months) Items: Date and time, host name, user ID, IP address, operation details *Also includes the use of cloud services *If using a cloud service that cannot meet the regulations for retention period, each company shall determine the period according to risk
			144	Optional	Application operation logs are obtained for important systems	[Rule(s)] •User and administrator operation logs shall be obtained [Applies to] –Important systems *Applicable systems are judged by each company according to risk [Log items to be acquired] –User ID, time stamp, operation details (login, logout, addition/deletion, etc.) [Retention period] –6 months *If using a cloud service that cannot meet the criteria for the retention period, each company shall determine the period according to risk
		Take measures to promptly detect and block cyberattacks in order to curb damage caused by targeted attacks and other such cyberattacks	145	Required	A system is introduced to analyze logs and detect cyberattacks	[Rule(s)] •A system shall be introduced to constantly analyze logs and given notification when an abnormality is found [Analysis targets] –Proxy servers, IPS/IDS, firewalls, endpoints, or a combination thereof [Monitoring period] –24 hours a day, 365 days a year [Functional requirements] –Incident alerts are issued immediately –Breaking incident reports are created and notifications given

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
24 Backup/Restore	Minimize the impact of system stoppages and data loss on business operations, and enable operations to resume quickly	Measures shall be taken to minimize the damage to important information and impact to system operations caused by cyberattacks	146	Required	Measures are implemented to block communication between malware that has intruded into the company and unauthorized servers	[Rule(s)] •A system shall be introduced to block communication from within the company to unauthorized servers
			147	Optional	For websites published on the internet, a system is introduced to detect site falsification and checks are made regularly	[Rule(s)] •A system shall be introduced to detect website falsification [Applies to] –Important external public websites
			148	Required	Restore procedures are established	[Rule(s)] •Restore procedure manuals shall be established for each type of data, etc., subject to backup •Backups should be stored in a secure location (e.g., external storage media) that cannot be encrypted by ransomware, etc.
			149	Required	Alternative means that can be used to perform business operations in the event of a system stoppage are prepared	[Rule(s)] •Viable alternative means shall be established for use in the event systems are down [Applies to] –Systems requiring a high level of availability (short allowable downtime) *Targets are determined by each company according to risk [Example measures] –Use of analog tools (fax, etc.) –Use of external information systems such as cloud services
			150	Required	Backup restore tests on important data and systems are implemented	[Rule(s)] It shall be confirmed that restoration is possible according to specified restoration procedures [Applies to] Important data and systems [Frequency] When constructing systems, making changes, regularly (determined according to risk)
			151	Required	Disaster prevention and environmental countermeasures are implemented in locations where equipment such as servers are installed	[Rule(s)] •Measures shall be taken against fires, floods, and power outages •Temperature and humidity shall be controlled

Label	Objective	Requirement	No.	Answer category	Condition(s) for Achievement	Achievement Criteria
			152	Required	For systems that are important for business continuity, data and procedures are prepared that satisfy recovery points and recovery times for each system according to necessity	[Rule(s)] Transaction logs and backups that can be used to restore to the required recovery point shall be stored. Procedure manuals shall be prepared that allow for restoration within the required recovery time [Applies to] Systems important for business continuity
		Anticipating a security incident, the data necessary for recovery meeting business continuity requirements are prepared	153	Required	Restore procedures are established	[Rule(s)] •Restore procedure manuals shall be established for each type of data, etc., subject to backup

6. Requirements to Our Suppliers

(1) Information security countermeasure and implementation of self-diagnosis

We would like to ask our suppliers to implement countermeasures prescribed in this Countermeasure Standard as well as self-diagnosis regarding periodical implementation status (Use the attached "Information Security Countermeasure Check Sheet for Suppliers"). We also ask our suppliers to submit the self-diagnosis result data (Excel file) to us on our request.

In addition, when the countermeasure implementation status of suppliers is not at the level prescribed by Our Company regarding this Countermeasure Standard, sharing of classified information with suppliers may be limited.

(2) Correspondence to audit

Our Company may execute an audit in order to confirm the countermeasure implementation status. Please cooperate with the audit process when requested by Our Company.

7. Other

This Standard will be reviewed and revised from time to time as a result of change in the circumstances which surround information security, revision of internal regulations, etc.
